

2003 Georgia Basin/Puget Sound Research Conference

Agreement to provide materials for publication in conference proceedings

The Georgia Basin Ecosystem Initiative partners and the Puget Sound Action Team (Action Team) and its co-sponsors are convening the *Georgia Basin/Puget Sound 2003 Research Conference* to foster communication of research results and related management issues concerning the protection and restoration of Puget Sound and the Georgia Basin. The Action Team will produce the proceedings of the conference for distribution from Action Team's web site, www.wa.gov/puget_sound, and on CD-ROM.

Everyone who makes an oral presentation during the concurrent sessions of the research conference may submit a **written manuscript** on their presentation for inclusion in the conference proceedings. Authors whose presentations are based on work that has been or will be published elsewhere should provide an **extended abstract** (rather than a complete manuscript) that cites and refers the reader to the more complete publication. Authors of posters and plenary presenters are welcome to provide manuscripts or extended abstracts, as appropriate.

By signing below, I attest that materials that I provide for inclusion in the proceedings of the *Georgia Basin/Puget Sound 2003 Research Conference* do not infringe on any copyright or other rights in any other work and are free to be reproduced. I also acknowledge that the Action Team reserves the right to record any portion of my presentation at the conference for later reproduction and distribution.
